

DIYIDEA/ FORMULA

SUNSCREEN-WHITENING FACE CREAM

SUNSCREEN-WHITENING FACE CREAM

Face cream based on the action of arbutin, stabilized vitamin C and natural whitening agent. This whitening active is derived from oilseed rape plant and has in vivo studies for the treatment of skin discolorations.

BeautyLab's sunscreen base has UV protection with measured SPF 30.

DIYIDEA #5

WHAT YOU'LL NEED:

Ingredients

Beaker

Stainless spatula
or spoon

Scale

PREPARATION:

Dissolve arbutin and vitamin c in chamomile water. Add the mixture to the sunscreen base and stir to homogenize. Pour it in an airtight container.
